

MODERN CONCRETE PANELS

make your interior look different

Your projects need unique style?
Loft Concrete lighter than you think!

Architectural Concrete
Modern language
of **Architects**

In many cases, architectural concrete is the modern solution.

Loft Concrete for your project

Loft Concrete Collection, easy to cut and install, offer simple solutions to create a contemporary ambiance with an authentic concrete look.

Mineral composite panels are just like real concrete that can be perfectly fitted together to form the modern structure on the wall.

Trendy look, simple form and natural beauty- Loft Concrete has it all.

About our product

Loft Concrete

Modern Decorative concrete tiles have always been associated with massive weight and complicated system of installation, they show us now a new, fresh look as Loft Design System panels perfectly imaging the structure of concrete. Loft Concrete decorative panels can be characterized by unique design which brings a lot of character to interiors and, such valuable these days, simplicity and rawness as well as sophisticated elegance which is perfect for every interior, no matter what style is leading.

Stainless steel decorative element*

*optional element, ask your reseller.

Create clean Minimalistic Design!

Optional, stainless steel decorative elements beautifully match the panels, cool and satin steel is great for all three colour versions of Loft Concrete tiles. The lightness of panels and possibility to adjust them to required dimensions make installation fast and easy, even on drywalls.

Unique Real Concrete Structure

One of the easiest ways to achieve an industrial look at home is to use industrial materials. Concrete is an obvious choice and in recent months we have witnessed a huge rise in the use of concrete in interior design.

Many designers are now using concrete in unexpected and unusual ways and it would seem that there is nothing that can't be made using this versatile material.

LOFT CONCRETE EDITION

Le Corbusier

“It seems to be really possible to consider **concrete**
as a reconstructed stone, worthy of being exposed
in its natural state”

Le Corbusier - Architect & designer, and one of the pioneers of what is now called modern architecture.

Le Corbusier was an architect in the true sense of the word
